

NON-HORMONE TREATED CATTLE PROGRAM

THE NON-HORMONE TREATED CATTLE (NHTC) PROGRAM ALLOWS YOUR CATTLE TO BE ELIGIBLE FOR BUYERS & BRANDS EXPORTING BEEF PRODUCTS TO THE EUROPEAN UNION. ACCESS NEW MARKETS TODAY!

BASIC REQUIREMENTS:

Calves can NEVER receive any growth promotants of any kind.

Calves must be identified with a Program Compliant Tag (EID tag) before they leave the ranch of origin.

Your ranch must maintain a quality manual (which we will provide) and train all family members and employees on the NHTC program requirements and proper procedures.

An onsite audit of your ranch is required annually.

Calves must move through NHTC approved locations at all times (i.e. they cannot sell through a sale barn that is not approved to manage NHTC cattle).

THE AUDIT PROCESS:

Prior to Evaluation

- Complete and submit your NHTC application and contract
- Schedule an onsite audit with an IMI representative
- Collect necessary records and feed tag information

- Ranch tour
- Calving records, inventory lists and documentation review
- Interviews with ranch manager and other personnel as necessary

During Evaluation

- Any non-conformances and corrective actions are outlined
- Audit report is distributed
- Corrective actions submitted
- Once compliant, a certificate of approval is issued

After Evaluation

Call or email us today to see if there's a beef verification program that fits your marketing needs.
